1: LEAD PAINT TESTING

Information

LEADSAFETY for Remodeling, Repair and Painting

HERO Inspections & Environmental is an EPA Licensed Lead Renovator Firm and therefore authorized by the EPA to test your home for lead paint. Lead paint is commonly found in homes built before 1978. This testing does not clear your home of paint, although it is the same test any renovator would do prior to demolition work. It's our hope to help you understand where lead paint may be present in your new potential home purchase.
